*First regular monthly payment* means the first annuity check payable on a recurring basis (other than an estimated payment or an adjustment check) after OPM has initially adjudicated the regular rate of annuity payable under CSRS and has paid the annuity accrued since the time of retirement. The "first regular monthly payment" is generally preceded by estimated payments before the claim can be adjudicated and by an adjustment check (including the difference between the estimated rate and the initially adjudicated rate).

*Former spouse* means a living person who was married for at least 9 months to an employee, Member, or retiree who performed at least 18 months of creditable service in a position covered by CSRS and whose marriage to the employee was terminated prior to the death of the employee, Member, or retiree. Except in §§ 831.682 and 831.683, *former spouse* includes only persons who were married to an employee or Member on or after May 7, 1985, or who were the spouse of a retiree who retired on or after May 7, 1985, regardless of the date of termination of the marriage.

*Former spouse annuity* means a recurring benefit under CSRS that is payable to a former spouse after the employee's, Member's, or retiree's death.

law of the jurisdiction with the most significant interest in the marital status of the employee, Member, or retiree unless the law of that jurisdiction is contrary to the public policy of the United States. If a jurisdiction would recognize more than one marriage in law or equity, the Office of Personnel Management (OPM) will recognize only one marriage, but will defer to the local courts to determine which marriage should be recognized.

*Member* means a Member of Congress.

*Net annuity* means the net annuity as defined in § 838.103 of this chapter.

*Partially reduced annuity* means the recurring payments under CSRS to a retiree who has elected less than the maximum allowable reduction in annuity to provide a current spouse annuity or a former spouse annuity.

Interest, mortality, and inflation rates used in computing the present value are those used by the Board of Actuaries of the Civil Service Retirement System for valuation of the System, based on dynamic assumptions. The present value factors are unisex factors obtained by averaging six distinct present value factors, weighted by the total dollar value of annuities typically paid to new retirees at each age.
